

From Demon Carburetion:

The Mighty Demon E85: A Carburetor for Today's Fuels

Dahlonega, GA – The new Mighty E85 ethanol carburetor by Demon is available in four sizes: 650, 750, 825, and 850. Identifiable by its gold colored baseplate and metering blocks, these new carburetors are calibrated for street applications.

In common with Mighty Demon practice, this new E85 carburetor has a wide range of fine-tuning adjustments. It features interchangeable idle and high-speed air bleeds, idle-feed restrictors and main jets. It also boasts free-flowing air entries, ridge-free concentric venturi bores, large capacity fuel bowls with sight glasses, and billet metering blocks and baseplate.
